

F&B Giant Optimizes Demand Planning with Anamind

How Anamind optimized operations and drove growth for a leading food & beverage company.

Industry: Food & Beverage

Business Model: Consumer Goods

Region: Global

How Anamind optimized operations and drove growth for a leading food & beverage company.

A leading global company in the food and beverage sector, known for its diverse offerings and dedication to quality, operates in a dynamic market with evolving consumer trends and intricate supply chains.

Anamind is a leading provider of demand planning solutions, empowering businesses to optimize their operations and achieve sustainable growth. With deep expertise in forecasting and supply chain management, Anamind helps companies navigate the challenges of volatile markets.

Challenge :

Prior to implementing Anamind's solution, the company faced significant challenges in managing its secondary sales and inventory. Their existing ERP system provided limited visibility into consumer demand beyond the distributor level, leading to:

Production Inefficiencies

High Channel Inventory

Stockouts

Anamind's Solution

Anamind collaborated with the company to implement a comprehensive demand planning solution tailored to their specific needs. The solution leveraged:

Machine Learning Models

Automated Data Integration

BI-Powered Demand Sensing

Outcomes

The implementation of Anamind's solution resulted in a significant transformation of the company's demand planning capabilities:

Forecast Accuracy Boost:

The company achieved a remarkable 14-25% increase in forecast accuracy, leading to better inventory alignment and reduced stockouts.

Optimized Production: Improved demand signals enabled efficient production planning, minimizing waste and downtime.

Enhanced Customer Satisfaction:

By ensuring product availability, the company strengthened customer relationships and loyalty.

Contact Anamind today to learn more about how we can help you achieve your demand planning goals.
